Preparation SET UP 1st time

1) Tool required

- Room or a space big enough to move
- [HTC Vive](#) set (from DDlab)
 - Visor
 - Controllers
 - Sensors
 - Connection cables
- Pc or laptop

If it's the first time that you use VR in your pc /laptop . if not go to step 6

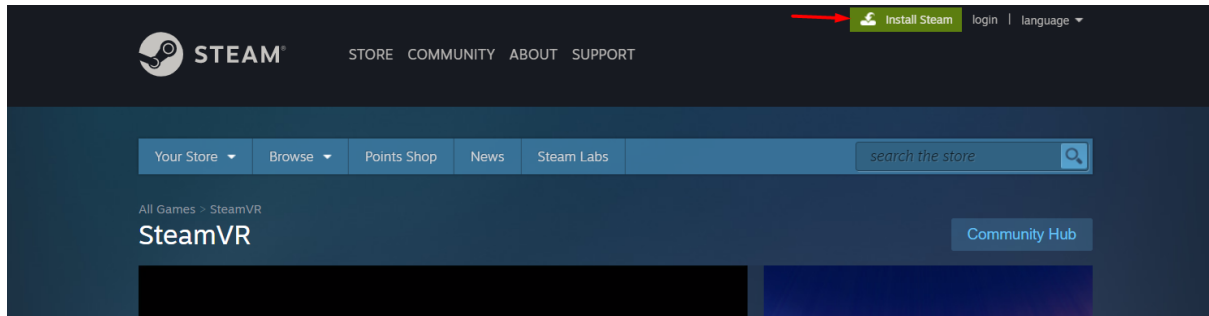

2) Set up VIVE ROOM download setup vive from <https://www.vive.com/sea/setup/>

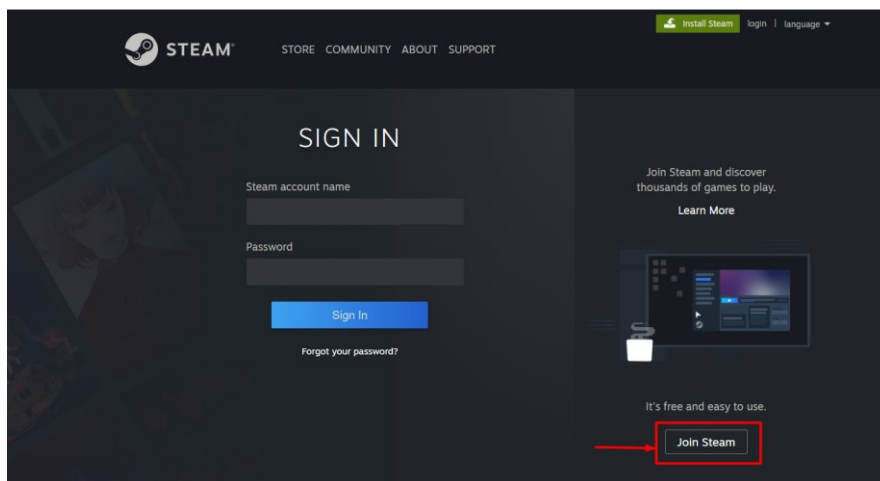

3)Download steam vr

<https://store.steampowered.com/app/250820/SteamVR/>

4) Create an account of Steam

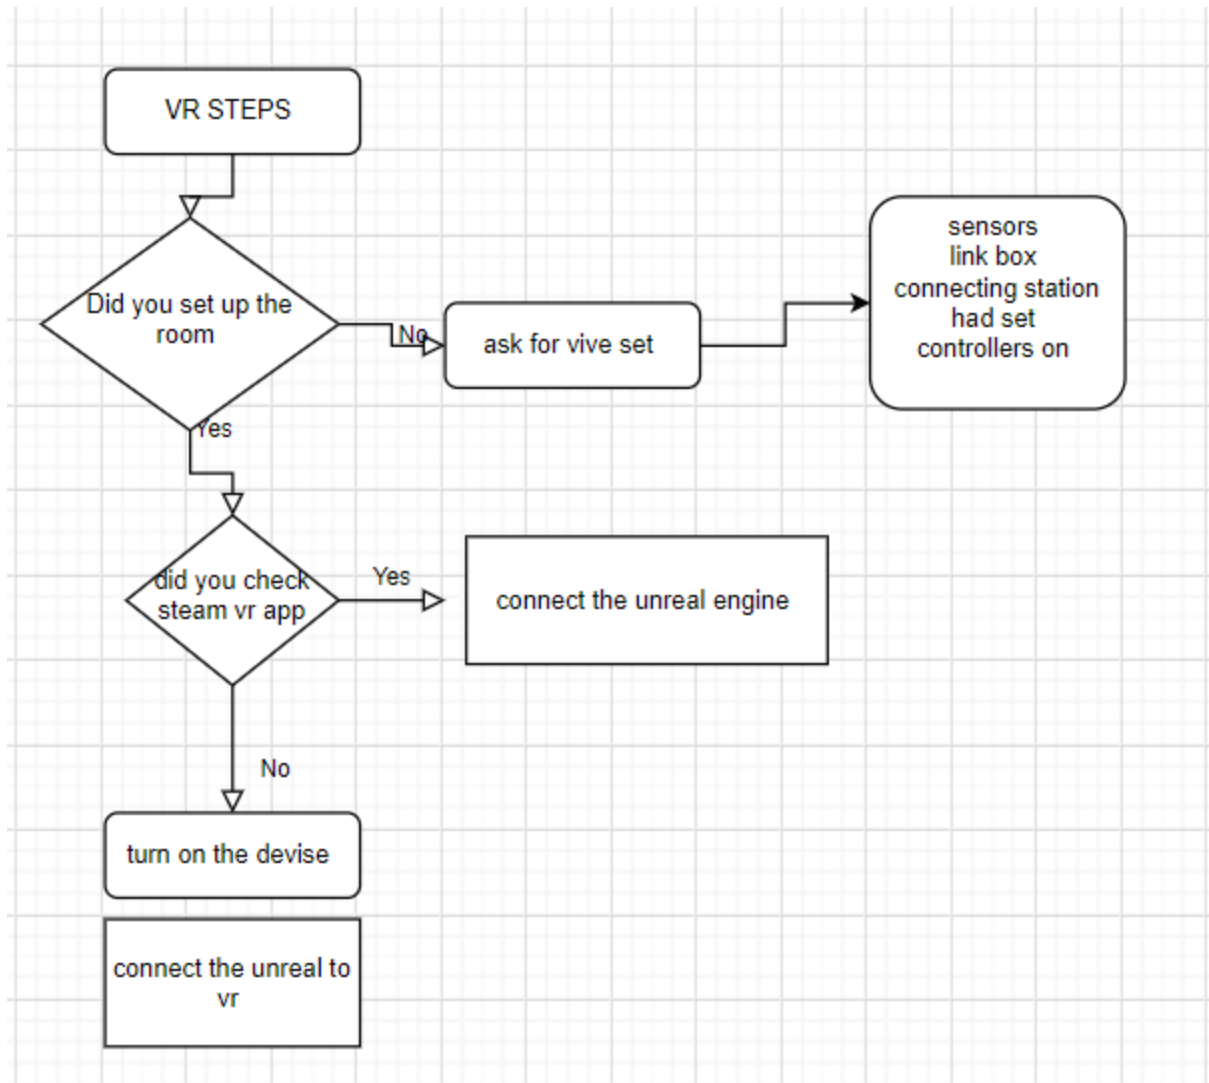

5)Download Unreal engine Epic Games Launcher

<https://www.unrealengine.com/en-US/>

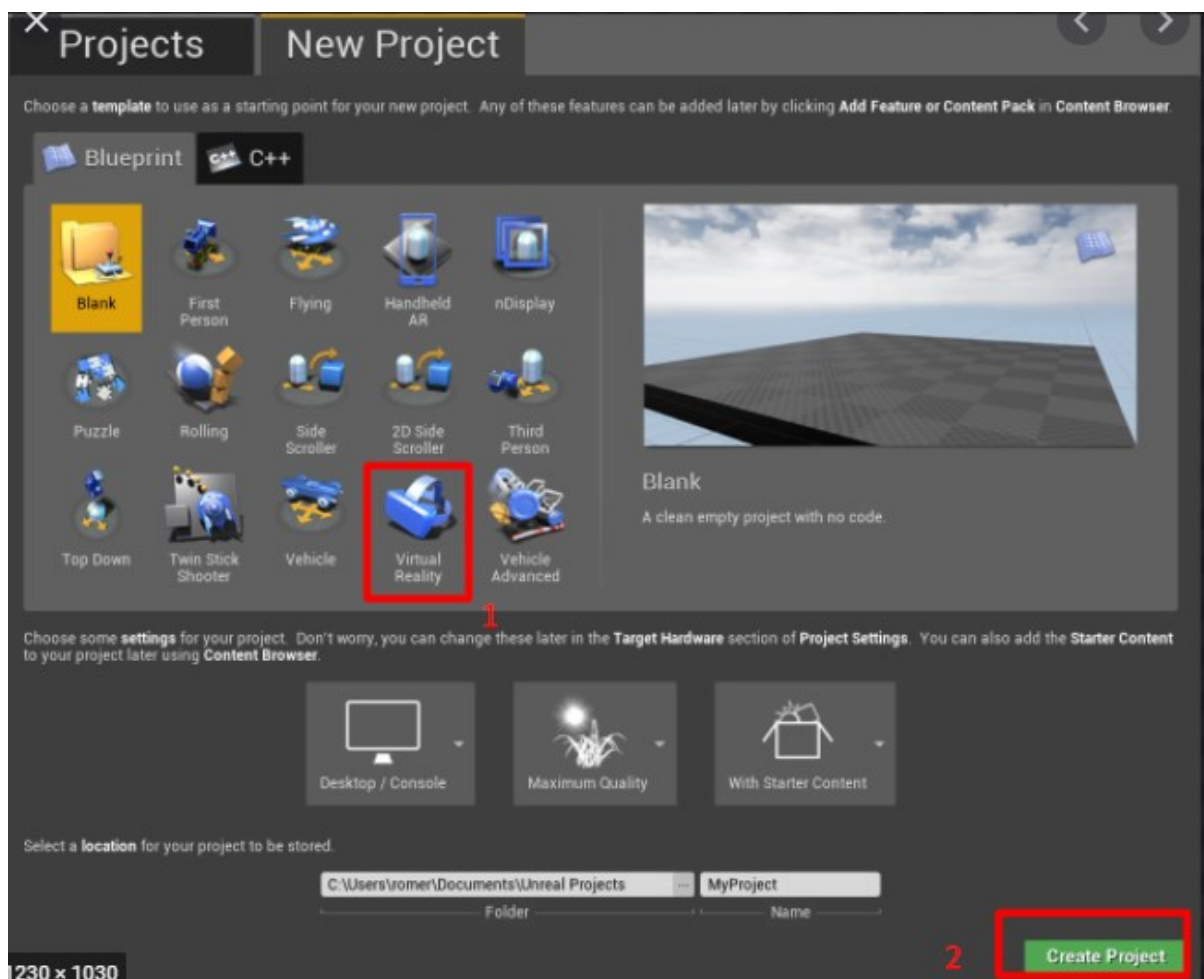

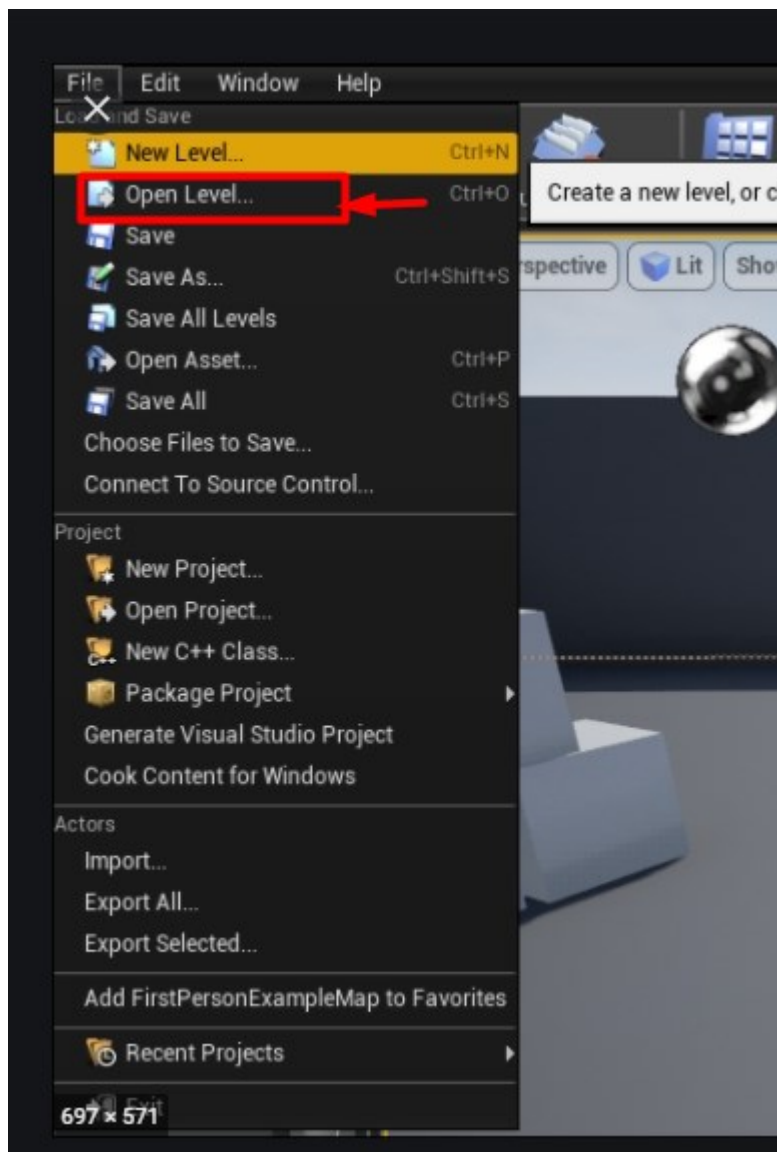

STEP 6 Connect VR steam to PC

NOW YOU CAN START

Create a 1st VR project in UNREAL ENGINE UE4

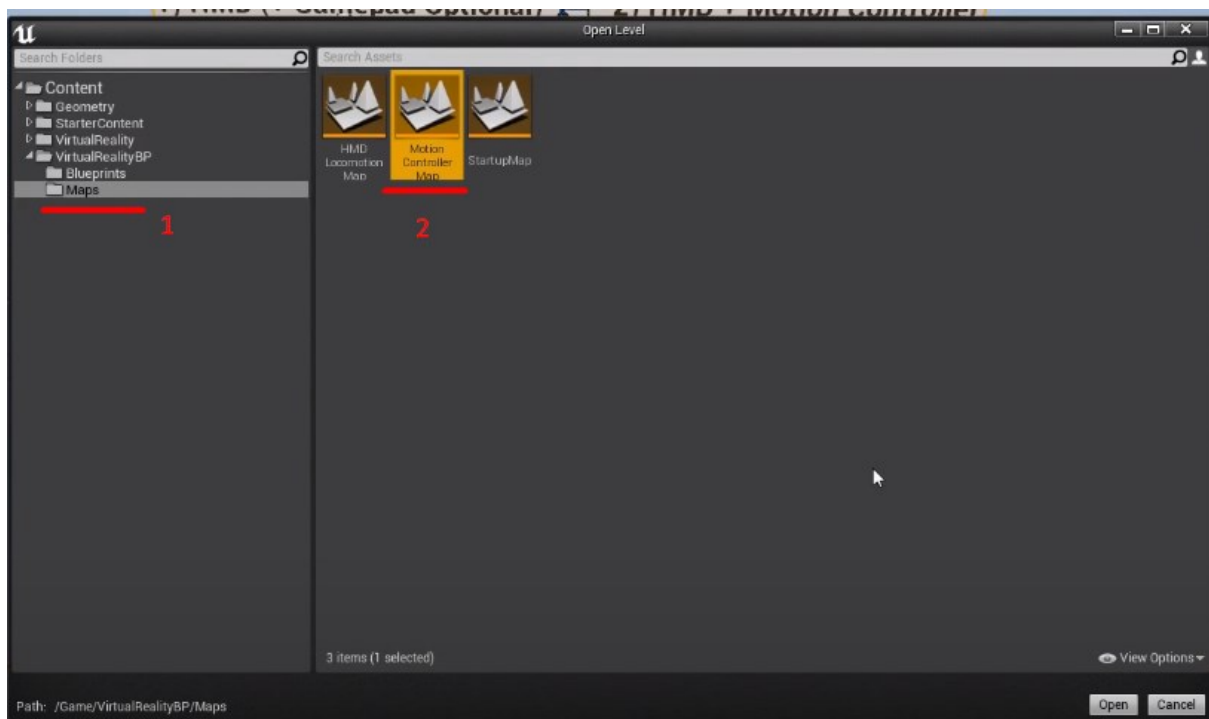

Open new level

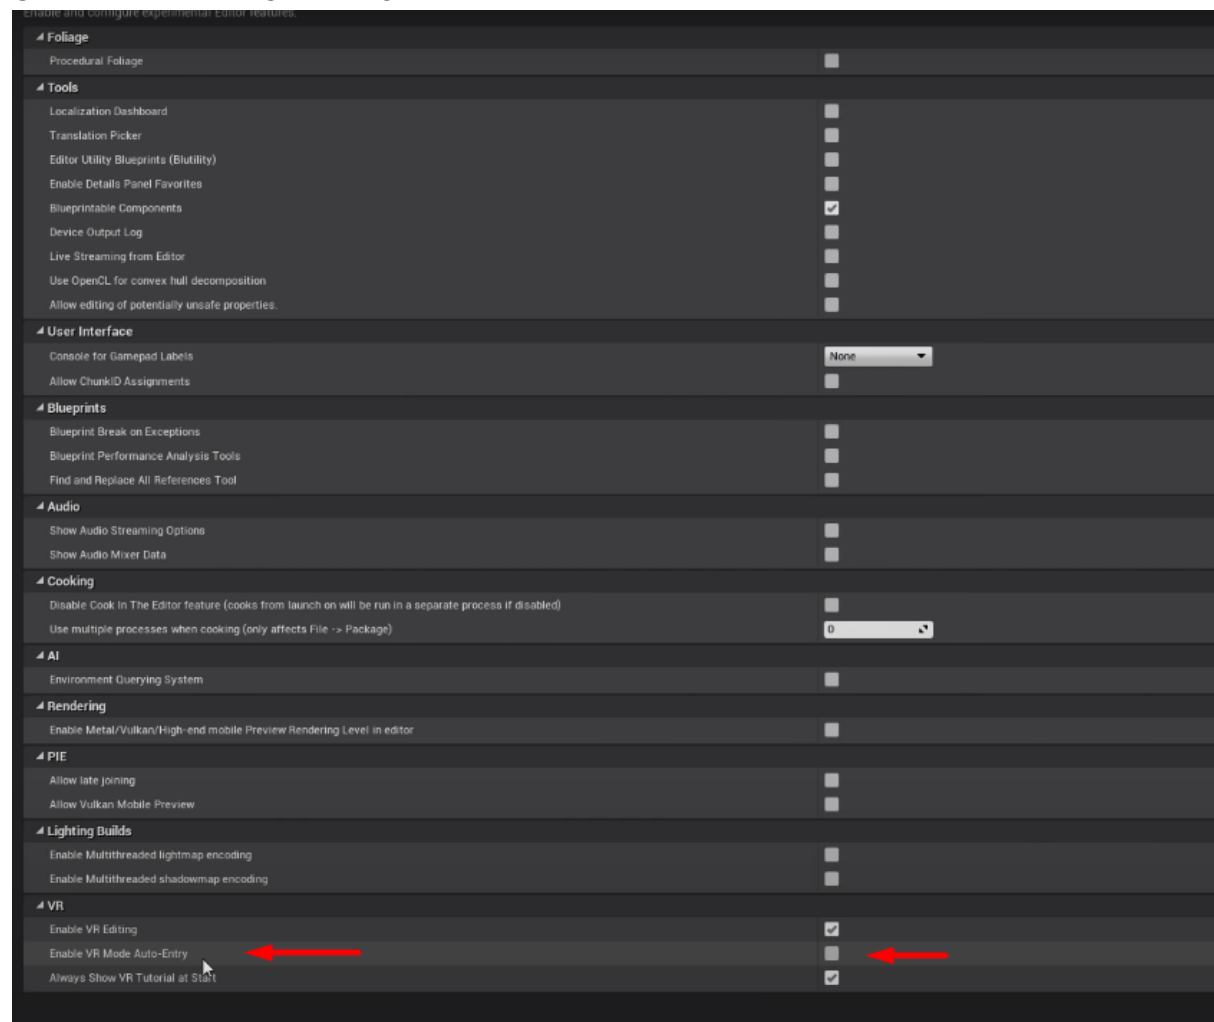

you can find both maps under **VirtualRealityBP/Maps/** in your Content Browser.

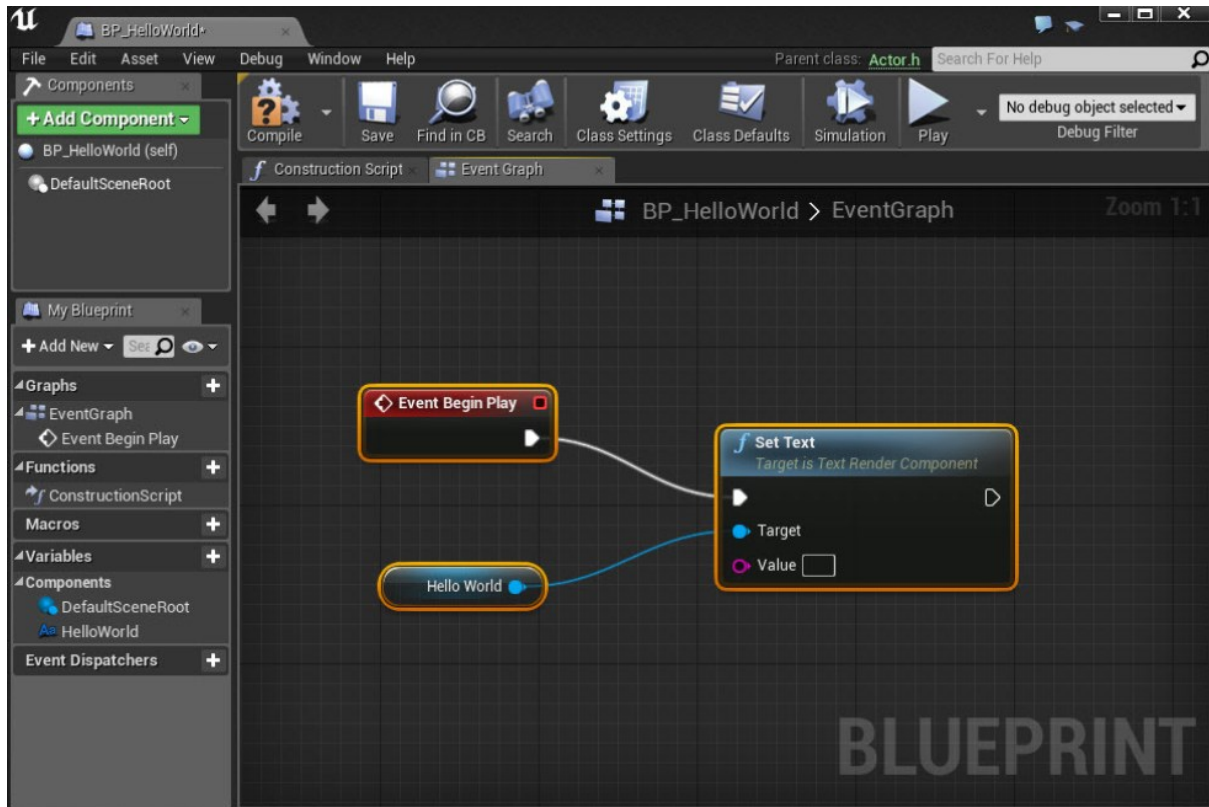

Under PREFERENCE EDITOR

Blueprint scripts examples

<https://docs.unrealengine.com/en-US/Resources/ContentExamples/Blueprints/index.html>

What is Blueprints scripts

The **Blueprints Visual Scripting** system in Unreal Engine is a complete gameplay scripting system based on the concept of using a **node-based interface** to create gameplay elements from within Unreal Editor. As with many common scripting languages, it is used to define **object-oriented (OO)** classes or objects in the engine. As you use UE4, you'll often find that objects defined using Blueprint are colloquially referred to as just **"Blueprints."**

Blueprint-specific markup available in **Unreal Engine's C++ implementation** enables programmers to create baseline systems
